Signature
& Date

Instructions

Lot Area:

The area is determined by taking the length x width of your lot. For irregular lots you may have to triangulate in sections and then add the total.

Setbacks:

You must complete the proposed setback column. Please enter the distances proposed from the subject improvement to each of the adjacent property lines.

Height:

For sheds and gazebos, etc. enter the height as measured from the lowest grade around the structure to the highest point of the shed. For decks, please enter the height as measured from the lowest grade around the deck to the top level of decking.

Maximum Lot Coverage:

In the existing impervious surface column please enter the total existing square footage for each of the categories listed. You can often calculate these areas off of the dimensions found on your plat of survey.

In the new/added column please indicate only changes in square footage by category – this change can be plus or minus – for example if you are removing a patio to construct a deck, indicate both of those changes in this column.

In the total impervious surface column please indicate the total square footage for each of the categories after the proposed construction takes place. The areas from the first two columns should be added and a total should be entered in each of the categories in this third column.

Requirements for Swimming Pool:

A minimum 5-foot high fence or wall is required to enclose an in-ground pool. You may enclose just the pool itself or the entire yard. If you install a fence, it must have a self-closing and self-latching gate, and the latch must be located at least 48" above grade. Please indicate in this section whether your existing fence or wall meets these requirements or whether you are submitting an application for a new fence or wall with your pool permit application.

Requirements for Spa/Hot Tub:

For spas and hot tubs, you have the option of protecting the water with a locking cover or with a fence/wall meeting the restrictions listed immediately above for swimming pools. Please indicate in this section how you which way you will protect the water.

Tree Protection Agreement

Property Address _____ Suite # _____ Date _____

Owner's Name _____

Owner's Telephone Number _____ e-mail _____

Contractor's Name _____ Contractor's Phone Number _____

Scope of Work:

- ☐ Driveway/Patio (remove and replace in kind or under 400 sq ft new)
- ☐ Emergency Sanitary Sewer Repair
- ☐ Interior Alterations
- ☐ Drainage Project/Storm Sewer installation or repair
- ☐ Walkway
- ☐ Water Service
- ☐ Other _____

Is there work to be performed within the public right-of-way? ☐ Yes ☐ No**If yes, please contact Public Works at 847-272-4711 for further information regarding parkway trees.**

I understand that I am not required to provide a tree protection plan for review prior to permit issuance for this emergency or improvement work.

I understand I am required to take all necessary measures to preserve and protect any trees within the designated work area including but not limited to tree fencing, trunk protection and root pruning.

I guarantee there will be no excavating through critical root zones, no materials, equipment or dumpsters stored, or vehicles parked on any unpaved or soft surface within the drip line of any tree on the subject or neighboring property and there will be no drilling into the bark, trunk or branches whereby the tree becomes a structural support for any accessory structures in or around the tree.

I understand that in the event I do not root prune prior to excavation, I will have to root prune any roots within the excavation flush to the wall of the excavation prior to backfilling.

I understand that I may be required to auger and/or bore the new utility rather than open trench within the critical root zone of any tree.

I recognize that the Village of Northbrook has a Tree Preservation Ordinance (Municipal Code Chapter 25). In the event I violate the Tree Preservation Ordinance or this Tree Protection Agreement, I will be subject to all applicable fines and tree replacements and understand I may be subject to a stop work order and be required to provide a full tree protection plan.

I agree to contact the Tree Preservation Officer at 847-272-4711 prior to excavating within 6 feet of any tree._____

Form Revision Date: 2-29-2024

Excavation Trenches:

1. When any roots are cut or torn during construction, it is **critical** that you **sharply cut all the ends of any exposed roots immediately**. Failure to do so will leave crushed and torn roots. This leads to decay and inhibits growth of new roots.
2. Pile soil on the side of the trench opposite the tree. If this is not possible, place the soil on a plastic tarp, plywood or a thick bed of mulch.
3. Do not compact the backfill on the trench more than its original firmness.
4. Water the backfill to allow the roots to begin healing.

Trenching near a tree can kill as much as 40%-50% of the tree's roots.

If the tree you are working around is in a confined space and your equipment will be coming close, it is important for you to protect the trunk. Wrap the tree trunk in old tires or place 2" x 4" studs around the tree and rope or band them together.

CONTRACTOR(S) OF RECORD

****IMPORTANT – Must be completed before permit can be issued****

This **completed** form can be submitted anytime during review process or at permit pick up. It is the applicant's responsibility to COLLECT ALL REQUIRED DOCUMENTS (requirements of each contractor are listed below) and submit all together to the Village.
