Subject: 2021 Manhole Rehabilitation Program

Resident
Address
Northbrook, IL 60062

Dear Resident:

The Village of Northbrook has contracted with Culy Contracting to rehabilitate certain Village manhole structures, including one or more located near your property. Manhole rehabilitation work varies from structure to structure but typically consists of sealing the interior of the manhole and replacing any worn components.

You are receiving this letter as staff anticipates work will be complete on one or more manholes listed below near your property:

- Manhole Number(s): [Manhole Number]
- Location(s): [Manhole Location]

Below are some frequently asked questions regarding both projects for your reference.

What is manhole rehabilitation?

Manhole rehabilitation includes a wide variety of activities ranging from lid replacement to epoxy sealing an entire structure. This is done to structurally reinforce the manhole, seal it from water infiltration and protect it from any corrosion.

How will this work impact me?

Manhole rehabilitation work is relatively unobtrusive work. However, please note that a number of personnel and vehicles with trailers to be parked near the manhole for potentially prolonged periods. This work will not impact your sanitary sewer service.

How long will the work last?

Manhole rehabilitation typically occurs over a few days depending on the work required. During manhole rehabilitation work, roads may be temporarily narrowed as crews work, but these interruptions tend to be brief.
