

District Regulations Of General Applicability

ARTICLE IX

PART I-C SIGN REGULATIONS

9-106 SIGNS

9-106 A. Purpose. The regulation of signs by this Code is intended to promote and protect the public health, safety and welfare by reducing the depreciation of property values caused by signs that are incompatible with surrounding land uses; by creating a more attractive economic and business climate within the office, commercial and manufacturing areas of the Village; by enhancing and protecting the physical appearance of all areas of the Village; and by reducing the distractions, obstructions and hazards to pedestrian and auto traffic caused by the indiscriminate placement and use of signs.

9-106 B. Scope. The regulations of this Section shall govern and control the erection, enlargement, expansion, alteration, operation, maintenance, relocation and removal of all signs within the Village visible from any street, sidewalk or public or private common open space. Any sign not expressly permitted by these regulations shall be prohibited. The regulations of this Section relate to the location of signs, by function and type, within zoning districts and shall be in addition to provisions of Chapter 6, Articles II and VI of the Northbrook Municipal Code applicable to the construction and maintenance of signs. Regulations concerning the use and termination of nonconforming signs appear in Section 10-106 of this Code.

9-106 C. Certificate of Zoning Compliance Required.

1. Certificate Required. Except as expressly provided in Subsection F hereof, no sign shall be erected, enlarged, expanded, altered, relocated or maintained unless a Certificate of Zoning Compliance evidencing the compliance of such work with the provisions of this Section and other applicable provisions of this Code shall have first been issued in accordance with the provisions of Section 11-401 of this Code; provided, however, that routine sign maintenance, changing of parts designed to be changed or changing the content of a sign in any manner does not change the functional classification of the sign and shall not, standing alone, be considered an alteration of the sign requiring the issuance of a Certificate of Zoning Compliance hereunder.
2. Additional Application Requirements. In addition to the information and documents required by Section 11-401 of this Code, every application for a Certificate of Zoning Compliance for a sign shall be accompanied by:
 - a) Plans and specifications showing the location on the lot or building face and the method of construction, illumination and support of such sign;

No receptacle or device housing a permitted light source for a sign shall protrude more than twelve (12) inches from the face of the sign or building to which it is attached; provided, however, that a receptacle or device housing a permitted light source for a sign may be located more than twelve (12) inches from the face of the sign if such light source is ground mounted, locked in place, and cannot be redirected.
- b) Level of Illumination. In no event shall the illumination of any sign, resulting from any internal or external artificial light source, exceed 175 foot candles when measured with a standard light meter held perpendicular to the sign face at a distance equal to the narrowest dimension of such sign face. All artificial illumination shall be so designed, located, shielded, and directed as to prevent the casting of glare or direct light upon adjacent property or streets.
- c) Signs Adjacent to Residential Areas. Any illuminated sign located on a lot abutting or across a street from, and visible from, any residentially zoned area shall not be illuminated between the hours of 11:00 p.m. and 7:00 a.m. except that such sign may remain illuminated during such time as the activity to which the sign pertains is open for business so long as such sign is not a public or private nuisance.
- d) Flashing Lights Prohibited. Except for permanent public service signs, institutional bulletin boards with electronic message board displays, and business signs with electronic message board displays expressly permitted by this Section, no flashing, blinking or intermittent lights shall be permitted.

2. Electrical Elements. All wiring, fittings and materials used in the construction, connection and operation of electrically illuminated signs shall be in accordance with the provisions of Chapter 6, Articles II and VI of the Northbrook Municipal Code.

In no case shall the structural elements of a pylon sign extend above the top of the sign face.

4. Minimum Elevation of Certain Signs. The bottom of every awning, canopy, marquee, wall and pylon sign shall be elevated at least eight (8) feet above grade. Whenever possible wall signs on the same facade shall maintain the same top and bottom elevations above grade.

11. Sign Maintenance. The owner of a sign and the owner of the premises on which such sign is located shall be jointly and severally liable to maintain such sign, including its illumination sources, in compliance with this Code and all applicable laws, in a safe and secure condition, and in a neat and orderly condition and good working order at all times, and to prevent the development of any rust, corrosion, rotting or other deterioration in the physical appearance or safety of such sign. The premises around ground and pylon signs shall be kept clean and free of all rubbish and weeds.
12. Sign Measurement.
 - a) Area to be Included. The supporting structure or bracing of a sign shall be omitted in measuring the area of the sign unless such structure or bracing is made part of the message or face of the sign.
